## New Narcissus Poetaz Hybrids

NEW POETAZ NARCISSUS, ELVIRA

## $N$. Poeticus Omatus $\times N$. Polyanthus Varieties

By crossing these two classes, Narcissus Poeticus Ornatus being the seed parent, our growers have succeeded in obtaining a perfectly hardy strain of bunch-flowered Narcissus. The individual flowers have al! more or less the Poeticus shape and size. Besides being hardy, this class has the merit that they have not inherited the strong, disagreeable scent of the Tazetta Narcissus. They are equally valuable for bedding and foreing. A bed of these Narcissus is simply covered by a dense mass of flowers. They force extremely easy. This is an entirely new strain and has no similarity with varieties of Narcissus known heretofore. This class was awarded the "Award of Merit" of the Royal Horticultural Society in London, April 19, 1904.

We have grown all the varieties listed below this last season and exhibited them during a recent flower show at the "Horticultural Hall," Boston, where we received "Honorable Mention" for same. They were absolutely hardy without the slightest protection, and we cannot too highly recommend them.

## LIST OF VARIETIES

Special offer of one bulb each of the entire set of above eleven varieties. each bulb named, at $\$ 1.50$ per set, four sets for $\$ 5$

## Rawson's Bulb Guide

NCOURAGED by the many favorable comments received on our publications of last spring, viz., Rawson's Floral Guide and Rawson's Guide for Vegetable Growing, we will publish this fall RAWSON'S BULB GUIDE. This book will contain the most up-to-date and reliable methods for growing bulbs, either for the house or outdoors. It will also present the purpose and uses of the many bulbs listed herein. Splendid new ideas and suggestions are given and in general will be a constant necessity to the amateur bulb-grower. For this reason we shall omit from this Catalogue all cultural directions and unnecessary descriptions.

RAWSON'S BULB GUIDE will be mailed free to any one who applies for it; also will be included with every order for bulbs if so requested on the Order Sheet.

## Rawson's Bulb Handbook for 1907

No expense, time or study has been saved to make this Catalogue perfect, and a careful perusal by our friends must bring forth the statement that we present this year to the American public the most interesting Bulb Catalogue ever published. It is interesting for two reasons: First, it offers an abundance of Choice Novelties, and second, it contains a most complete list of species of bulbs so attractive to the student of botany; but not only to him, for some of our prettiest flowers are raised from the species. For the supply of a great many of the species offered herein we had to look to the Holy Land, Turkey and Siberia, where some have been collected, others cultivated.
QUALITY IS OUR CLAIM. We take great pains to examine every bulb before it is shipped, to insure soundness, size and perfection; we furthermore engage bulbs from only the most reliable sources in Europe: we pack them carefully and are positive that the quality of our bulbs is above reproach. Hundreds of testimonials have been received by us this last spring, and we should like to add yours to the collection. One single trial will accomplish this.

## BUREAU OF EMPLOYMENT.

Any lady, gentleman or estate requiring the services of a superintendent, head gardener, assistant or coachman would render us a great service by permitting us to recommend them reliable parties who seek positions. We constantly receive applications from reliable, well-experienced men who desire to make a change in their employment.
INFORMATION BUREAU.
We cheerfully supply, to the best of our ability, any information desired on the subject of Gardening and Farming, and solicit correspondence. Prompt reply assured. No charge for such service.

# RAWSON'S BULBS FOR FALL 1907 <br> <br> Visit Rawson's Dahlia Farm During September <br> <br> Visit Rawson's Dahlia Farm During September and October 

 and October}

For the convenience of our customers, and to facilitate the selection of desirable varieties for another season, we have established an extensive Dahlia Farm, upon which we have planted this year the largest and choicest collection of Dablias ever exhibited on one field. Our collection comprises over nine hundred distinct varieties; many of them are novelties, never before grown in America. We extend a cordial invitation to all our friends to visit this most interesting flower farm during the next two months. Intelligent guides always on hand to give any desired information. Our farm is situated at Green street, Marblehead, Mass., within five minutes' walk from the railroad station and right in the heart of the old historic town. Marblehead can be reached by railroad from North station and by trolley via Lynn and Salem. We feel certain that a visit to our Dahlia farm will amply repay any lover of flowers. Sunday visitors especially welcome.
DAHLIA FLOWERS. For the eonvenience of those who cannot visit our farm we shall be glad to ship by express during this fall a selection of cut blooms, each flower labeled with the name. Each request must be accompanied with a remittance of $\$_{1}$. This is merely to cover the cost of box, the labor of cutting, labeling and packing and delivery to express office. Each selection will contain 100 flowers and we shall be pleased to consider the wishes of our friends in regard to the colors and types to be selected.

## PHOTO ALBUM

We have a complete collection of photos of the different subjects offered herein, which are bound in book form and which may be seen at any time at our salesrooms. No charge.

## FOREIGN CORRESPONDENCE

Our constant connections with foreign countries require, in our employ, efficient linguists. We can carry on correspondence in the following languages: German, French, Italian aud Spanish.

## Free Delivery

#### Abstract

We deliver free of charge, either by express or mail, within a radius of 50 miles from Boston, any order entirely composed of bulbs amounting to $\$_{3}$ or over.

We deliver free of charge, either by express or mail, to any post office or express office in the United States, any order entirely composed of bulbs amounting to $\$$ ro or over.

We mail free of charge all bulbs listed in this Catalogue at the single or dozen rates, except with a few heavy species specified in this Catalogue, for which postage must be added to the order according to the rate given.

Plants can be sent by express only, as we furnish but a large specimen of any variety. Postal rules corfine us to a certain size of package which would compel us to pick plants of inferior quality, which would produce poor results.

No charge for packing, cartage or delivery of goods to any railroad station, steamer or express office in Boston.

Name and address should be carefully written on every order. Special mention should be made if express offices and post offices are located apart, and we should appreciate mention of your preference of transportation.

Please use attached order sheet; extra blanks gladly furnished upon application. We do not offer premiums, but enclose with every order a liberal collection of bulbs for trial ; we then select such varieties as are not duplicated in the order.

PRICES.- We don't pretend our prices to be the cheapest, but we send out every article contained in this list in a reliable quality and as true to name as human possibility can suggest.

## Rawson's Mixed Bedding Hyacinths

## LARGE UNNAMED HYACINTHS IN SEPARATE COLORS <br> FOR FORCING AND BEDDING

Our mixed Hyacinths are of the largest size and should not be compared with cheap mixtures offered elsewhere. The variety of colors we offer is so extensive that beautiful effects may be produced with them. Great care has been given to the selection of varieties used for each mixture so as to produce their flowers all at one time and at the same height.

## Rawson's Special Named Bedding Hyacinths EXTRA LARGE BULBS FOR BEDDING AND FORCINC

To produce fine color effects in gardens, parks and estates, it is essential for the flowers to be of distinct and decided shades and exact uniform height, also to flower all at the same time. To meet this want we offer the following splendid sorts. They may also be used for forcing, grouped in bulb pans.
Baroness van Thuyll. Pure white; broad truss.
Gertrude. Beautiful bright pink.
Gigantea. Light rose; large spike.
Grandeur a Merveille. Blush-
White. Maitre. Sky-blue, shaded $\underset{\text { violet. }}{\text { Grand }}$
Ida. Pure vellow.
King of the Blues. Deep purplish blue.
La Grandesse. Pure white; immense spike.
La Peyrouse. Clear porcelain-blue.
Mr. Plimsoll. Ivory-white; fine bells.
Robert Steiger. Deep crimson, large truss.
Rosy Gem. Deep rose.
Sarah Bernhardt. Salmon-rose.
Doz., \$1; 100, \$6.50; 1,000, \$55.
W e furnish 6 bulbs at the dozen rate; 25 at the 100 rate; 250 at the 1,000 rate.

RAWSON'S FIRST PRIZE EXHIBITION HYACINTHS

## Rawson's "Miniature" or "Baby" Hyacinths

These are often called "Dutch Romans." -They produce a miniature flower of loose formation and are especially used for fern-dishes or shallow bulb pans. They are far more graceful than the regular Hyaciuths, and for that reason alone should be more universally grown. Twelve bulbs of one color should be planted in a $\bar{i}$-inch pan. For that reason we offer named varieties, so as to produce a handsome effect.

Chas. Dickens. Light blue.
Gen. Pelissier. Crimson
Grandeur a Merveille. Blush-
white.
Gertrude. Bright pink. Moreno. Blush-pink.
L'Innocence. Pure white.
Lord Derby. Light blue.

Roi des Belges. Deep scarlet.
Voltaire. Creamy blusb white.

## Rawson's "First-Prize" Exhibition Hyacinths

## COLOSSAL BULBS

These should produce Specimen Flowers. But few of these bulbs are usually collected and therefore the quantity is limited

## SINGLE RED AND PINK SHADES

Fabiola. Pink, distinctly striped crimson.
Gertrude. Handsome rose-pisk; excellent flower.

## Rawson's <br> Early Roman Hyacinths

This beantiful and valuable variety, if planted early in September and gently forced, will bloom in November, or their flowering may be retarded until Christmas by keeping them in a cool place. By successive plantings they may be had in bloom until March. The flowers, which are smaller than the ordinary Hyacinths, are produced in great profusion, each bulb throwing up three or four spikes of delicate scent.

Rawson's Guide For Flowers. Rawson's Practical Guide, Vegetable Growing. Rawson's Bulb Guide. Mailed free upon application.

## SINGLE EARLY TULIPS

For complete cultural directions apply for RAWSON'S BULB GUIDE (mailed free)
No other Hower excels the Tulip in beauty of form, brilliancy of color, effective bedding and gorgeous show. They are equally desirable tor bedding as well as for pot culture indoors. For ontdoor bedding the most brilliant effect can be produced by massing colors whichor contrast whell. Our list of
named varieties is the most complete in this conntry, especial care being taken
to offer but the choiccst sorts. All our hulhs have been picked and should
prove of superior size and quality.

## Rawson's Arlington Prize Mixture

We pride ourselves in offering the choicest mixture of Tulips in this country. Over 250 of the choicest sorts of Tulips are used to produce this blending. We give great study to the selecting of varieties that will flower at the same time and grow of even heimht. in order to produce the most brilliant mass effect. We use but the largest bulbs for this mixture, which is undoubtedly unsurpassed.
In order to avoid disappointments and to guarantee an equal proportion of colors with every order, no matter how small, we shall blend this mizture at the time of filling the order, and for the order only.

Doz., 40 cts ; $100, \$ 2.50 ; 1,000 . \$ 20$

## Rawson's Special Mixture

A superior mixture of good bulbs. Doz., 20 cts.; $100, \$ 1.25 ; 1,000, \$ 10$.

## Rawson's Fine Mixture <br> Doz., 15 cts.: $100, \$ 1 ; 1,000, \$ 8$.

## SINGLE EXTRA-EARLY DUC VAN THOL TULIPS

SINGLE EARLY tULIPS KEIZERKROON AND VERMILION Brillidant

These are "Miniature" Tulips and intended for shallow fern pans or small pots. They are extremely graceful and should be planted early, that they may be had in bloom by January 1. They hare lately become very popular with the better classes, where they find the proper appreciation. We offer them in the following handsome shades:

## NAMED SINGLE EARLY TULIPS New, Rare and Choice Tulips

The varieties listed below are the cream of recent introductions and are quite an improvement on the Standard varieties either for coloring, size or perfection.
Dainty Maid. Pleasing delicate pink: a grand flower and a valuable novelty. Each, 10 cts.; doz., 75 cts.; $100, \$ 4.50 ; 1,000, \$ 35$.
Epaminondas. Deep rosy pink; long flower. Each, 10 cts. ; doz., 60 cts ; $100, \$ 3.50 ; 1,000, \$ 25$.
Flamingo. Shape like White Hawk; color white, flaked rosy red. Each, 25 cts.; doz., $\$ 2.50 ; 100, \$ 15$.
Golden Lion of Hillegom. Golden, changing to fiery orange-scarlet; most distinct. Each, 30 ets.; doz., \$3: 100, \$20.

Golden Queen. The largest pure rellow flower among Tulips. Each. 15 cts.; doz., $\$ 1.35 ; 100, \$ 9: 1,000, \$ 80$. La Remarquable. Dark purple; height, 10 inches. Each, 10 cts. : doz., 60 cts. : $100 . \$ 3.50 ; 1,000, \$ 30$.

## NAMED DOUBLE LATE TULIPS

These flower from middle to en: of May

We furnish 6 bulbs at the dozen rate; 25 at the 100 rate; 250 at the 1,000 rate

## LATE-FLOWERING SINGLE TULIPS

## Also Called May-Flowering and Cottage Tulips

Our exhibits of these Tulips shown before the Massachusetts Horticultural Society bave been muen admired. These lovely late-flowering Tulips are rery effective for all kinds of decorative work, and their value as cut- Howers cannot be overestimated. They are all perfectly hardy; raised in the most northern parts of Great Britain and Ireland and are eminenty fitted for border cultivation for bedding, forcing and every purpose to which the carly-fowering Inalip is put. They often grow from 2103 feet high, and Hower usuaily about Memorial Day, lasting fully two wecks in blomm. We have given this group considerable attention in recent years and we can fully recommend the varjeties listed below as the best of their kind. Comparison will show that our list is the most comprehensive offered in the Cnited states.

ing or bedding.....per $1,000, \$ 18 \ldots 05$ S. 3.500

## Rawson's Exquisite Darwin Tulips

This class is without doubt the Queen of Tulips. It comprises a grand selection of the older Breeder Tulips and the coming race for effective garden display. They range from 2 t 3 feet in height and their flowers are massive, weather-resisting and very persistent. They are well adapted for every garden use, particularly for the planting of grass vistas, the approaches to woodland and in shrub beds; their constitution is so strong that grasses cannot choke them and they will thrive for several years without further aftention. They force radily and we can recommend them for that purpose; indeed, there is no finer group of Tulips for conservatory decoration at their season than these Darwins. They embrace nearly all shades of white, lilac, rose, red and crimson, whilst a few new and rery interesting types are colored mauve, heliotrope, maroon and black-purple. Their centers are always clear and well defined, and in many cases a ring of white, gold or blue divides the basal from the petal coloring.

## List of Varieties

The following varieties have been selected as the best from an enormous collection grown at our trial grounds and must give satisfaction to the most critical flower lover.
Antony Roozen. A beautiful early-flowering

RAWSON'S EXQUISITE DARWIN TULIPS

## Fall- and Winter-Blooming Crocuses

Are you not astonished to learn that there are hardy Crocuses which will bloom outdoors in the North between November and March with no protection whatever? Most of them are from the Holy Land, and all should be planted as early as possible in the autumn. The dates given below are the earliest they luye been kuown to flower, but even if they do not bloon until March they are well worlh while, for they will usually be seen in bhom amid the show, as accompanying illustration will show. The bulbs should be extensively planted and the risk of losing them can be greaty lessened by blanting them in the sumniost and most =helternd nook .

We heartily recommend their use by the thousands on southern estates, especially winter-homes in the Caroligas and Georgia, where they will glorify the otherwise barren month of January. Whe believe alno, that they will succeed even in Canada, though blooning at the end of winter. The tinue of bifoom depends chiefly upon the openness of the winter. I inter flowers are certamly exciting, becanse of the uncertanty about the time of blomme and what can be more interesting than to find flowers outhoors in blom in your own home grounds right in the middle of wiuter! Several of these varicties are offered here now for the tirst time.

## Species of Colchicums

Autumnale major (commonly'called Meadow Saffron) The rosy, lidac blossoms appear from September to Norember. Doz., $\$ 1 ; 100, \$ 7.50 ; 1,000, \$ 70$.

(Novelty, 1907.) Grows 2 feet in height. Flowers very freely and produces from four to five flowers on each stem: color bright yellow, changing to deep orange in the center; flowers do not droop. Quantity limited. Each. \$1.

## Chinese Sacred Narcissus <br> (CHINESE NEW YEAR LILY) Ready in October

They are somewhat similar to the Polyanthus Narcissus and are usually grown in bowls partially filled wirh pebhles and water. We offer sound, Mammoth Bulbs, each, 10 cts.; doz., $\$ 1 ; 100, \$ 6$.

We have been fortunate in securing some Jumbo Bulbs of the Chinese Lilies, which we offer at: Each, $15 \mathrm{cts} . ;$ doz., $\$ 1.50 ; 100, \$ 12$.

## New Irish Narcissi

Ireland is the home of the Narcissus, and really the choicest sorts are produced there. Robinson says: "Next to the lily in ralue as an ontdoor flower is the Aarcissus, though when we know the iris better it may find a high place." But the wondrous detelopment of the garden forms of Narcissus during recent years and their fitness for our climate give it great ralue. In some cool, lomy soils they take to the turf as ducks to water. The true hardiness of the flower allows of the being enjoyed in all parts of this country.

## AJAX AND TRUMPET NARCISSI

LADY BEATRICE POLE CAREW (White Ajax). The purest white
trumpet existing, and especially numed by desire. The flowers tirst appear
as if sulphur, but after two or three days nothing to equal it for whiteness,
romarkiably so under glass; foliage of metallic green hue, the plant very
boalthy and of rapid increase. Each. $\$ 3$. $\qquad$
We furnish 6 bulbs at the dozen rate; 25 at the 100 rate; 250 at the 1,000 rate

## New Irish Narcissi, continued

HELEN FALCONER (White Ajax). Perianth Each long, deep sulphur and pendulous, toning off silvery white, Very distinet and fine....doz., \$3..\$0 30
Ivanhoe. A concolor bloom of rich lemon-yellow, not unlike John Nelson, but better and more lasting; strong grower.
Lorna Doone. Here we hare the most distinct yellow Ajax in commerce. Segments and trumpets rich canary-yellow, fluted or cylindrical. stiff, bold erect habit and most lasting. It is distinct and lovely
Milkmaid. Small white Ajax. A seedling of Colleen Bawn and Moschatus. A great beatuty, partaking of the formation of the Colleen, and rery hardy.
Polly Eceles (Bicolor). Segments pale primrose, trumpets a richer tone; beautifully serrated and folded hack; small, but one of the most perfect blooms.
Spread Eagle. Rich, uniform glistening yellow, after the form of Iris princeps, with its twisted segments; deep green, very strong foliage. This is a strong yellow Ajax Daffodil.

## New Tall Giant Leedsi Seedlings Narcissi

Very fine introductions; vigorous giant growers and producing a lasting display, and so very early. We recommend these highly.
Constance Pierpoint. 22 inches. Pure Each Doz. white, star-shaped segments, rich yellow cup, well expanded; very early and of rapid increase. .$\$ 0 \quad 30 \$ 300$

LADE MCCALMONT NARC'ISSUS

RAWSON'S NARCISSUS BERNICE

Lady Gregory. 26 inches. Large white Each Doz. and noble bloom of this class; most vigorour; much finer than the Duchess of Westminster
$30 \quad 300$
Lady McCalmont. 26 inches. Perianth large, pure white, over 4 inches across, beautifully twisted and grooved; broad white crimped cup, edged with citron; very vigorous, most lasting; increases rapidly and forms huge bulbs' $\qquad$
Leander. 18 inches. Perianth pure white, reflexed and grooved, cup pale citron, toning off white; stiff erect babit; very distinct

300
Robe. 20 inches. Pale yellow, dying oif white. The segments overlap like Bicolor Grandee. Cup rich yellow; broad and fimbriated massive foliage; rich perfume.

## Leedsi Seedlings with Orange Cup

To produce these orange colored Leedsi the European hybridizers have been working for a century, and at last their efforts seemed to be crowned with success. We are glad that we are first to offer these novelties to the American public.
Loadstone. Segments pure white, overlapping Each with a deep red and most brilliant cup from the base; exquisite. $\qquad$
Nectarine. Flowers $31 / 2$ inches across, ivorywhite; the cup $3 / 4-\mathrm{in}$. in depth and of the color of a tangerine orange; the reddish color is derived from a cross with Peclamen. This was the first Leedsi with orange cup..

## New Red-Cupped Seedling Narcissus

The following are abmolutely ornsiatal athl mark thoe approach of an entirely mew class of Datrotils, the mame of which has mot been decieled upon at the time this catalogue was insued.
Bernice. Segments creamy white and pointed; Each cup fummel-shaped and deep blood-red to the
base; uarrow gransy foliage. Very early and for nooks on rockwork or for pots delightfui. Height x in. ........................................................... 80 Orestes. ## Ready In November

A specialty of exceptional value both for forcing and outdoor culture. Extremely early-flowering Flowers outdoors in June and July

These beatiful early-flowering varieties are invaluable for pot culture and for border planting. Tisey force readily, and they may be had in flower from the end of April till the end of July. They may be foreed like ixias, but they require more pot room, and they are invaluable for their yield of cut-flowers from the open in June and Julf. They last long in water, and every flower opens to the extremity of the spike. Their rich colors and vivid markings on the lip petals rival those of orchids, and we recommend this group not only for their beauty, but because they are very easy to grow. A light soil and a slight protection with litter during very sharp frost will prove all they require, and the spikes will be longer and the flowers larger if the plants are mulched in dry weather.
Ackermanni. Salmon-orange, with white blotches edged searlet. Doz., 30 cts.; $100, \$ 1.50 ; 1,000, \$ 12$.
Ardens (Fire King). Fiery scarlet, pink flakes. Doz., $\$ 2.50 ; 100, \$ 18$.
Blushing Bride. Pure white, with deep crimson flakes; most effective. Doz., 30 ets.; $100, \$ 1.50 ; 1,000, \$ 12$.
General Scott. Delicate rose, red blotches. Considered one of the best pink varieties. Doz., $\$ 1.50 ; 100, \$ 10$.
Lucretia. Large white, flusherl rosy flesh, yellow blotch, edged red. Doz., $\$ 1 ; 100, \$ 6 ; 1,000, \$ \overline{0} 0$.
L'Unique. Rich coral-red, with earmine tips, flaked white and edged crimson; a very rich form. Doz., \$2; 100 , $\$ 1 \overline{5}$.
Modesty. Very light violet, blot.hed rose. Doz., 40 cts.; $100, \$ 2 ; 1,000, \$ 15$.
Ne Plus Ultra. This Gladiolus received an "Award of Merit" from the Royal Horticultural Society, London, England. Grows 3 feet high and has maunificent spikes of reddish samon flowers, with white tongueshaped blotches on the lip petals. Forces splendidly, and likely to prove the standard Gladiolus for this purpose. Every bud opens in water. Doz., $\$ 1 ; 100, \$ 7$.
Orange Queen. Clear orange-scarlet, blotched white. Doz., 40 cts.; $100, \$ 2 ; 1,000, \$ 15$.
Peach Blossom. Rosy blush; extra. The most delicate colored Gladiolus. Doz., 60 cts ; 100, $\$ 4$; $1,000, \$ 35$.
Pink Perfection. Deep rose. Doz., 25 cts.; 100, $\$ 1.50 ; 1,000, \$ 10$.
Prince of Orange. Dark oranqe-pink, flaked white and margined carmiue. A grand Gladiolus. Doz., 90 cts.; 100, $\$ 6 ; 1,000, \$ 50$.
Queen of Holland. Pure white, fiaked light sulphur, bordered red Doz., 50 cts . ; 100, $\$ 3 ; 1,000, \$ 25$.
Queen Wilhelmina. Blush-white, with conspicuous blotches of cream, with searlet margins. Doz., 75 c ; $100, \$ 5 ; 1,000, \$ 40$.
Rosy Gem. Rosy pink. Doz., 40 ets.; 100, \$2; 1,000, \$18.
Salmon Queen. Beautiful salmon-pink. Doz., 50 cts.; 100, \$3; 1,000, $\$ 25$.
Sappho. Delicate lavender, with faint creamy blotches edged violet. Doz., 30 cts.; 100, $\$ 1.80 ; 1,000=\$ 15$.
Sans Pareille. Light lilac, small blotch on lower petal. Doz., $40 \mathrm{cts} . ; 100, \$ 2 ; 1,000$, $\$ 15$.
Tristis. A slender-growing grassy species 2 to 3 feet high, producing lovely sweet-scented yellow flowers, the petals of which do not reflez so fully as most others. Quite pretty and novel. Doz., $\$ 1.25 ; 100, \$ 8 ; 1,000, \$ 75$.

## GLADIOLUS COLVILLI

Alba. A small-flowered type used for forcing in greenhouses, producing compact spikes of pure white flowers. Doz., 25 cts.; $100, \$ 1.50 ; 1,000, \$ 11$
Rosea: Delicate pink. Doz., 25c.; 100, $\$ 1.50 ; 1,000, \$ 11$.

CHRISTMAS ROSE, IBLOOMINI; IN THE SNOW

fritillaria meleagris (see page 28)

## HELLEBORUS NIGER

## (Christmas Rose)

## NEW ENCLAND-GROWN STOCK

For the first time we offer bererritb New Eng-land-grown roots of this valuable plant. Which we are certain will stand the severe winters and flower from December till March, often right in the snow, as the accompanying illustration shows. Foliage remains waxy green all winter and the white and often blush pink flowers will last for weeks after being cut. The ideal plant for the Winter-garden. Divided roots (ready to flower, winter $1908-1909$ ). Each, $\$ 1$ : doz., $\$ 10$.

## HEPATICA

## (Anemone Hepatica)

A beautiful early hardy flower. In sheltered spots on porous soil the foliage will remain through the winter. The Hepatica is a deup rooter, hence it thrives so well upon made banks. Where let alone and not often publed to pieces, it makes strong tufts. Clumps of the rich colored reds, whites and blues, when a mass of bloom in March, are rery beautiful.

No. 50. Three crimson petals, yellow base.

## ENGLISH IRIS (Iris Anglica)

This is a beatiful Hower, and the many harden rarie. ties are among the finest things we have in early summer. The English Itis got its popular name ma rather curious way, being sent from its I'yrenean home, where its distribution is limited, to Bristol traders, thence to Holland. The Dutch, supposing it to be a nutive of English shores, called it the Euglish Iris. The Howers ure quite distinct in aspect from those of the Spanish Iris and appear a fortnight or so later. They are broad and display a delightful diversity of color from deepest purple to pure white. They are easily cultivated and well worthy of a place in every garden. Iris gardems are coming iato vogue, and with the ahove variety a flowering season is filled which otherwise would be hare. Our collection comprises:
Cuba. Deep blue
$\begin{array}{cc}\text { Doz. } & 100 \\ \$ 065 & \$ 400\end{array}$

## SPANISH IRIS (Iris Hispanica)

A very beautiful flower, and an old inhabitant of English gardens. This Iris is absolutely hardy in this severe New England climate and does particularly welt in light friable soil between shrubs and merennials. The flowers are produced in early June, and the display of the bright colors makes a most gorgeons effect. The proper thing to do is to mass about fifty bulbs of a single variety in a clump and allow it to remain in the ground undisturbed until the grassy stalks show the imporerished soil and degenerated roots. The have carefully selected the varieties offeres herein and know they will give perfect satisfaction. $100 \quad 1.000$

## IRIS PALLIDA DALMATICA

A giant German Iris of vigorous growth, producing flower stems 3 to 4 and often 5 feet high which are lined with fire to ten enormous fleur-de-lis of a most attractive delicate sky-blue shade. It is a rare variety and excellent for naturalizing. The splendid effect of mass. ing them in large clumps or long rows in the natural garden can be admired to perfection in the interesting estate of Mr. Chas. W. Parker, of Marblehead Neck. Dlass. This variety increases rapidly. We bave a splendid stock of this gorgeous Iris. Eacls, 50 cts ; doz., \$又̄̄): 100. \$35.

## NOVELTY, 1907

## Iris Regelio-Cyclus

## (ONCO-REGELIA)

Awarded a first-class certificate by the Royal Horlicultural Society, London, Eng. The Oncoeychas Iris, which has been erossed with the ficoman Beadless Iris in order to produce this new hybrid, is a variety whioh is rather difticult to cultivate, but its colormis is such that only fancy orchids conld outrival. 'This new chass bas adopted the qualities of its other parent in regard to cultivation, and we dace claim will grow easily almoss anywhere, but, on account of the limited number of bulbs available, the prices will be high for a few years to come, and we would advise to plant the bulb in a frame if possible, with litter covering during the winter in order to lessen the risk of loss during severe winters. The Howers are large; the flower-stems are stronir and of good length and carry generally is to 4 flowers, while from 3 to 4 flower-stems on a plant may be expected. It is impossible to convey through desuription anywhere near the apprach of the colorings. These Howers must be sten to be appreciated.
The following varieties are offered for the first time in the United States
Aspasia. Very showy flower, dark violet-purple, petals mahogany brown, beautiful'y spotted.
Charon. Dark brown, veined black; no such color ever known before in Iris.
Eurydice. Grand variety with lilac-rose Howers, drooping petals of a lilac ground. reined dark violet.
Iphigenia. Grand velvety purple blooms, of which the lower part of the petals are greyish

## IRIS REGELIO-CYCLUS, continued

Ises. Very large, with grand flowers of a rubrred self-color, with grey and purple veins. This variety is undoubtedly the most beautiful of this new class.
Psyche. Flowers are of a silvery white ground, veined brown; a superb variety.

## Each bulb $\$ 5$

## IRIS PUMILA

## (Dwarf Iris)

Excellent plants for rockeries, edges of Iris beds or the hardy border, forming pretty tufts of dwarf flowers. For bordering, plant in a donble row 4 inches apart; they soon make a dwarf and very effective edging. All flower in early spring. Doz, $100 \quad 1,000$ Purpurea. ## VARIOUS IRISES

Caucasica. A tiue early-ilowering bulbous Each Duz Iris, with large yellow tlowers and tille foliage; matkes a fine pot plant.. 100, \$18..\$0 25 末心
Forsteriana. A large bulbous Iris C'anary: yellow tlowers, the lower parts being haded violet
$50 \quad 500$
Heldreichi. One of the most distinct and beautiful Irises introduced for many years. Was awarded a firm-chass certif. cate from the Royal Horticulqural Society, London. In shape and habit it resembles Persica; the Hower is, however, much larger. The standurds are of a fine lifht sky-blue and the falls rich deep hlue, al most black, with a few scattered spots above on lighter grounds.
$25 \quad 3 \quad 30$
Histrioides. Bright blue, large flowers: finer and earlier than the preceding. A griand lris.
Orchioides (Tuberous -rooted). Dark orange-yellow, with black spots on fall; rery effective; four to six flowers on a spike; magniticent when well established. Very scarce, and one of the finest Irises in cultivation.
Pavonia (Peacock Iris). Beantiful blue flowers, with dark blue spot; likes a warm position; grows well in pots
$100, \$ 1.25: 1,000, \$ 9$.
Persica purpurea Sindjarensis. A grand novelty, resembling Orchioides, with three to six large pearly blue Howers horne tier above tier from the leaf bases. (See illustration, page 33) $\qquad$
Rosenbachiana. The most beautiful of all the early forms. Vigorous, producing two to five white fowers, tinged with pale lilac, falls rich brown with golden blotch; very beautiful and striking; very scarce.
Susiana (the Mourning Iris). One of the most singular of all flowers; from $1 \frac{1}{2}$ to $21 / 2$ feet high; the flowers very large and densely spotted and striped with dark purple on a gray ground. It should be grown in sumny nooks in the rock-garden or on sheltered banks and borders, but always in light, warm soils

Tauri. This Iris is one of the best of the Each Doz bulbous group, both as regards hardihood and richaess of coloring. It bears a general resemblance to 1 . Heldreichi, but is of a bright violet-purple color through. out: purple-black on the falls, with a few large blotches and spots of white: golden yellow on the crest. It is dwarf, scarcely exceeding 5 inches in height. the Howers being fully 4 inches across................... $\$ 0$ 40 4400

## ISMENE CALATHINE <br> (Peruvian, or Sea Daffodil)

These handsome plants are almost wholly unknown to American growers. They are deciduous bulbs of a very ornamental character, producing long arching leaves of the richest glossy green and quite a yard bigh. The towers are produced in glorious umbels and resem. bles patcratium, measuring 3 to 4 inches across the petals, the centers of the flowers resembling the trumnets of narcissi. Half-hardy: easily grown in pots. They enjoy a rich soil. Euch, $150 . ;$ doz., $\$ 1.50 ; 100, \$ 10$.

## IXIAS

Pretty winter-blooming bulos for house culture. Plant twelve bulbs in an b-inch pan, cover 1 inch with soil and treat the same as byacinths. They appear in most brilliant colors, such as yellow, pink, scarlet. crim son, orange and green. Highly recommended.

## RAWSON'S <br> LILIUM CANDIDUM

## (ASCENSION. OR MADONNA LILY)

These are the famous bulbs from northern France, and, although they can be successfully forced, they are far better for the open garden. Our bulbs are grown by a private grower in France and are beautiful specimens.

Our bulbs are of enormous size and should not be compared with those of inferior quality offered elsewhere. Each, 15 cts.; doz., $\$ 1.50 ; 100, \$ 10$. Original baskets of 200 bulbs at $\$ 18$.

## LILIUM PHILIPPINENSE

A new Lily that was discovered in our new island possessions. It comes from the district of Benguet in the Philippines, and as that is in a high latitude it may be hardy. We are quite certain, though, that it is an excellent Lily for forcing. Though the bulbs are very tiny, they have produced from two to three Howers in less than eiwht weeks. The stems average " feet in height, are wiry and are lined with long, narrow leaves, which gracefully droop. The flowers are of the purest white, tubular-shaped, the tube being very narrow and graceful and often measures 12 inches in length. The fragrance is intense, gardenia-like and the most distinct of any Lily. We offer flowering bulbs at 30 cts . each, $\$ 3$ per doz., $\$ 20$ per 100 .

## Hardy Lilies <br> our specialty

Original importations usually do not arrive until late in November, invariably too late to be planted in the East. We therefore arranged for a double importatiou lase spring, the duplicate being planted at our nursery at Arlington. We are therefore able to ship any of the varieties listed below from Obtober 1 onward.

Lilium Candidum should and must be planted in September if success is desired.

To plant Lilies properly please consult Rawson's Bulb Guide.
Auratum (Golden-banded Lily of Japan). This variety grows on a strong stem, 4 to 5 feet high, from six to twelre immense blooms which measure nearly a foot when expanded. 'The flowers are white.

LILIUM AURATCM

Lilium auratum, contmued
with a broad yellow stripe Each Doz. 100 through the center of each petal and freely spotted crimson. Their fragiance is delicious.

## PEONIES

The Peonies are among the noblest and most magnificent of our herbaceous plants. With the addition of superb newer varieties, Peonies have taken rapid strides in popular favor and are now classed as among the most popular of our garden perennials. The colors bave the greatest range, embracing white, flesh-color, rose, pink, salmon, yellow, scarlet and crimson in lighter and darker shades. The varieties listed below are a selection of the choicest old varieties and the cream of the newer sorts. Ready for detivery September 1.

## Japanese Peonies

## A SUPERB COLLECTION OF THIRTY varieties

This collection comprises thirty of the very choicest varieties imported direct from Japan and is undoubtedly one of the most superb assortments of Peonies ever offered in this country. It includes both single and double sorts, ranging from pure white through the different shatks of pink and red to the deepest erimson.

They are all perfectly hardy and, if planted in rich soil, will produce a magnificent bed the next season. Per root, 75 cts.; doz., $\$ 8.50$. Complete set of 30 varieties, $\$ 20$

## SAUROMATUM GUTTATUM

("Monarch of the East")
Produces out of the dry bulb, without water or soil, a beautiful colored Hower-spathe, 16 inches long. A highly remarkable beautiful bulbous flower, attracting immediate attention. The only treatment required is to simply place the large, Hat, round bulb on a table or shelf in a warm room or greenhouse; very soon the bulb begins to show a head and within a few weeks (sometimes after eight to ten days), according to season and temperature, a curionsly formed flower 16 to 18 inches long develops. The flowers, which are spotted dark red on yellowish orange-red ground, are entirely different from any other as to coloring and shape.

After flowering, this bulb should be planted in the open ground, where it then throws up elegant dark green, wide expanded foliage, which itself forms a fine subject in the garden, particularly when planted in May in a moist and sheltered place. Very large bulbs, each, 25 cts.; doz., $\$ 2.50$. If wanted by mail, add 5 cts. postage for each bulb. Delivery after November 15.

## SCILLA

A very popular spring thower commonly called "squills." Appear in pink, white and blue, the latter color being more generally cultivated.
Sibirica. The old-fashioned blue squill. Usually grown in with crocus and snowdrops, bearing beauti-

## SPIREA

The varieties we list below may cither be grown as hardy peremials out-of-rioors, or as a spring-flowering pot-plant. They are most derorative, bearing immense pancles of pure white feathery flowers which rise high above a delicate, but rich green foliage. They are sold in enormous quantities by florists for an Easter plant. Ready in November.

## STERNBERGIA LUTEA

A most gorgeous fall-flowering bulb. Panted out during Aurust, it will produce a wealth of bloom during Septumber and remain in the ground to reproduce the same effect next season. The Howers resemble a fairy lily and are excellent for cutting. Golden yellow. Doz., $50 \mathrm{cts} ; 100, * 3 ; 1,000$, §25.

## TROPAEOLUM

A beantiful pot climber of extremely easy cultiration. lhant six buliss in a 6 -inch pot. corering bulbs an inch with soil. Place pot in a sunny window abd. as growth appears, supply a small stake 18 inches high for each bulb. Affer a few inches of growth the plants will change their individual support until the stakes are conzpletely corered with a most delicate, gracefully cut foliage. The flowers appear toward spring, are tiny, cigarette-shaped and beautifully colored.
Jarratti. Scarlet, yellow and black. Each, 10c.; doz., \$1.

SNOWDROPS GROWING IN THE GRASS

Narcissi naturalized in grass

## The Best Bulbs for Wild Gardening

The prettiest, cheapest and most permanent way of growing flowers in great quantities is to naturalize them in the grass. Many daffodils, once planted in otchard or meadow, require no further care, and the hay crop can be harvested without injuting the bulbs. In favorable circumstances they will multiply so rapidly that you can dig them every four or fire years and use the increase for new plantings, so that you may have fiowers literally by myriads at less expense than in any other style of gardening. Every lawn in city, suburbs or country should contain thousands of crocuses, snowdrops and other flowers that bloom in March or before the last snows. In the spring of 1907 these blossoms were canght by the continental snowstorm of April 10, and were, in some cases, covered 10 inches, but they emerged smiling and unharmed. Even if the bulbs last only two or three years, the effect is so charming and the bulbs so cheap that it has became the custom to buy fresh lots every year. Estate owners can quickly redeem and glorify uninteresting woodlots of second-growth timber by planting with a free hand, trilliums, adder's tongues, bloodroot and the hardiest wild flowers of other countries. Wild gardening is the most important development in floriculture of recent years, and we are in hearty sympathy with it. We shall be glad to make personal visits after June 1, anywhere in New England where our advice may be desired in connection with wild-garden problems. As the most refined taste does not permit double flowers or flowers greatly modified by man in this style of gardening, we do not recommend garden tulips, Von Sion daffodils, etc., for this purpose.

## Started Bulbs in Pans and Pots

To accommodate our numerous friends, who requested us in former jears to start bulbs for them, and encouraged by the increasing demand for these, we have made special arrangements to have the following list of bulbs potted properly and stored in coldframes until wanted by our customers. When we ship these bulbs they will show but the least sign of growth, and all that is required afterwards is to water them regularly and place in a sunny window. Failure is impossible. Nothing is more interesting than to wateh the development of a plaut from its first beginuine.

## SUTTON'S SEEDS

We take pleasure in announcing that we have made arrangements with Messre. Sutton and Sons, Reading, England, to distribute their world-renowned seeds to their American friends who so desire.

SUTTON'S CATALOGUE will be loaned upon application. All orders for spring, 1908, delivery, should be in our possession by February 1, 1908, to insure early delivery. We shall be glad to give further information upon this subject.

# Rawson's Select Hardy Perennials 

## For Fall Planting

No class of plants enjoys greater popularity at the present time than the Hardy Perennials. They have made rapid strides into public favor the past few years, until now they may be considered to have a prominent and a permanent place in our American gardens. They have for many years been qreatly in demand in European corntries and everywhere have given the best satisfaction. According to the modern id -a of landscape gardening, the ideal garden is not one whose beds are laid out on geometric lines, but rather one where there is a closer resemblance to nature: and this can best be effected by the use of perennials giving a great range of color, and at the same time a continuity of bloom throughout the season.

Most of the plants listed below can be shipped in September, with the exception of late-flowering varieties, such as hardy asters, Japanese anemones, bardy chrysanthemums, ete., which are not ready until October. We can ship these, however, before that time, if so desired. In such cases we shall have to cut the growth back before shipping. A great many varieties of bulbs are suitable for the perennial border or garden, and it may require a shifting of the plants on hand to make room for the newer ones. Hor such instances, we wish to volunteer the information that it is perfectly proper to transplant perennials at any time of the year, provided it is a rainy or clondy day.

All perennials on following pages to be sent by express only, purcháser paying transit. Positively no plants or roots sent by mail.

We will guarantee all plants or roots sent by express to arrive safely

planting of hardy perennials and in good condition, and, if not notified within 10 days from receipt of goods, we shall consider them as received in satisfactory condition and ur responsibility ceases.

On account of the severity of the past few winters, we positively refuse to replace plants in the spring which were purchased this fall and failed to winter over.

## POT-GROWN SEEDLINGS OF PERENNIALS AND BIENNIALS

The following plants are from seed sown in June, and established in small pots ready for setting out this fall 'They will make strong, flowering plants for next season's blooming, and if started early and if protected properl: will succeed in withstanding the winter oftentimes as well as the field-grown plants.

CAMPANULA

HARDY ASTER

## CAMPANULAS

## (Hardy Perennials) Ready in September

Carpatica. A dwarf, compact-growing variety with blue bell-shaped flowers, borne erect to a height of 9 inches, from June to September. Each, 15 cts.; doz., $\$ 1.50$.
Carpatica alba. Similar to above except in color, which is a pure white. Fine for borders. Each, 15 c . doz., \$1.50.
Glomerata acaulis. A new dwarf-growing Campanula, with handsome clusters of dark blue flowers. Of great value for rockwork and borders. Each, 30 ets.; doz., $\$ 3$.
Glomerata Dahurica. A superb variety of Campanula, valued for the rich, deep purplish blue flowers. Grows to a height of about 1 foot and is in Hower from June to September. Promises to become one of the most popular of the Campanulas. Each, 30 cts .; doz., $\$ 3$.
Persifolia, "Die Fee." Among thousands of plants of Campamula pessicifolia thin Jariety was early discovered to be entirely different from the regular type. The plants grow 4 feet high and bear stalks which are covered for fully 3 feet with enormous flowers of a most delicate azure-blue. Each, 25 cts.; doz., $\$ 2.50$.
Persicifolia gigantea plena, "Moerheimi." A superb variety of recent introduction and a great improvement in every respect. The flowers are all very double, pure white and measure 3 to $3 \frac{1}{2}$ inches across. Undoubtedly one of the finest of the Campanulas. Each, 20 cts,; doz., $\$ 2$.
Persicifolia grandiflora coerulea. Large purple bell-shaped flowers during June and July, and borne on a spike 3 to $31 / 2$ feet high. Each, 1õc.; doz., $\$ 1.50$.
Persicifolia grandiflora alba. A pure white form of above. Each, 15 cts.; doz., $\$ 1.50$.

## We are Headquarters for Rare and Choice Dahlias

## SHASTA DAISY

The most showy perennial in existence
Although of western origin, this plant does remarkably well in our New England climate. Flowers are of mammoth size, having broad petaks of great texture and borne on long, stift stams, which make this flower inviallable for coutting. The Common Type, each, 15 cts.: doz.. $\$ 1.50 ; 100, \$ 10$.

Mr. Luther Burhank, the great horticulturist, has wonderfully improved this beaturiful Hower, and has -reated three new and distinct varieties, which we oftor below. The plants attain a height of 2 feet and bear form 50 to Ju0 of the latgest Daisies imatimable Some of the flowers are far larger than chrysanthemums. They are contmously in bloom. We have hundreds of these in our nursery, where, without care, they have done admiratbly. A number of our customers who purchased plants of these varieties last spring, are unstinted in their praise, and all unite in testifying to their valne. Alaska, California and Westralia, each, 35 cts. (loz., $\$ 3.50$. Set of three varieties, $\$ 1$.

DELPHINICM, BURBANK'S HYBRIDS

## DELPHINIUM (Larkspur)

## NAMED HYBRID DELPHINIUMS

## Ready in September

The following varieties of named Delphiniums are among the finest in cultivation. All have beautiful spikes ranging from 12 inches to 2 feet in length, and are most valuable for the berbaceous garden.

Price of the following, each, 25 cts.; doz., $\$ 2.50$.
Belladonna. Beautiful clear blue, with white eye.
Falka. A beautiful combination of blue and deep rose, with brownish center.
Gloire de St. Maude. A very deep blue, with distinct bronze center.

Named Hybrid Delphiniums, continued
Imbricata. A finely formed spike, with very deep lilue flowers.
Mrs. Rooper. A very soft mauve, with primrose eye. Triomphe de Pontoise. Haminome pale blue, with distinct bluck eye, forming a most beautiful contrast.

## VARIOUS DELPHINIUMS

Burbank's Hybrids. Mr. Burbathk has spent a sreal deal of time in improving this popular flower and we believe he has succeeded well. Some individual How ers, when measured, showed the enormous size of 3 to $31 / 2$ inches. The plant itself grows fully 6 fert himh and produces a mass of gigantic spikes which and covered about two-thirds with these graceful Howers The variety of colors is limi:ed to blue, but evory shade of this color can be found among them. Each, 25 cts.; doz., \$2.50.
Cardinale. Beantiful scarlet flowers. 3 feet high. Each, 25 ets.: doz.. ※2.う0.
Chinense album. A pure white Larkspur, bearing flowers in open heads. Grows about $\$$ feet high and is in bloom most of the summer. Each, 15 ets .; doz., $\$ 1.50$.
Chinense azureum. A delicate clear blue form of the above. Each, 15 ets.; doz., $\$ 150$.
Formosum. The noost popular and considered by many the best of the Larkspurs. Flowers are a deep blue, having a white eye, and are produced on Jong spikes. Quite hardy, and of very eacy culture. Blooms most of summer. Height about 4 feet. Each, $15 \mathrm{cts} . ;$ doz.. $\$ 1.50 ; 100$. $\$ 10$.
Formosum coelestinum. Similar to Formosum, but light sky-blue in color. Very beautiful, Each, $1 \bar{j}$ ets.; doz., \$1.50. 2
Speciosum. A very bright blue variety growing 3 feet high. Each, $15 \mathrm{cts} . ;$ doz., $\$ 1.50$.
Zalil. A distinct var ety: bright yellow flowers on finc spikes. Each, 25 cts.; doz., $\$ 2.50$.

## HOLLYHOCKS

## Ready in October

One of the best known of our Hardy Perennia!s. They are perfectly hardy and grow to a beight of 6 to $\delta$ feet. The plants when in full bloom are ornaments to any garden. Their tall stalks covered with large bril. liant flowers stand out prominently and ulways attract the greatest admiration.
RAWSON'S PRIZE DOUBLE. For the past few years we have sold enormous quantities of our Prize Double Hollyhocks. This strain we select ourselres and without doubt is the equal of any other in the range of color, perfection of form and percentage of double Howers. We offer them in the following enlors: Flesh-CoIor, Pure White, Red, Bright Rose, Deep Maroon, Sulphur-Yellow. Strong plants, each. 20 cts.; doz., $\$ 2 ; 100, \$ 12$. Set of six varieties for $\$ 1$.
Mammoth Allegheny. A grand flower seldom less than 4 inches in diameter and of very transparent texture, so delicate, in fact, that it has the appearance of crushed silk. As hardy as the old-fashioned Hollyhock, and in many ways superior. Strong plants. each, 20 cts ; doz., $\$ 2$

## SINGLE HOLLYHOCKS

In order to meet the increasing demand for Single Holl whocks in separate colors, we hare this year grown a fine stock of the above and offer them in the following colors: Bright Rose, Flesh-Color, Maroon, Red, Sulphur-Yellow, White. Each, 20 cts.: doz., $\$ 2$.

## CLIMAX LAWN SAND

Will destroy weeds in your Lawn

## HARDY PHLOX

This magniticent family of Hardy Perennials may be well termed the most widely known and deservedly popular of all the various plant, we have in our gardens. There is no peremnial more worthy of culture, more satisfactory in every situation, or more suited for individual planting or grouping for mass effect. They are at their best in the late fall, producing grand 'oeads of flowers of the most varied amd williant colors. We offer 18 of the finest rarieties as follows:

Each, 20 cts.; doz., $\$ 2 ; 100, \$ 12$. Complete set of 15 varieties, $\$ 1.75$
Boule de Feu. A bright vivid scarlet.
Coquelicot. Fine pure scarlet with deep carmine eye. One of the most striking.
Eclaireur. A deep carmine-rose with lighter center. Very early and coutinuous bloomer.
Etna. A very deep red.
Graffin von Lassburg. One of the finest pure white Phloxes in existence. Enormons heads male up of very large individual pure white Howers.
Iris. Very large flowers, perfectly formed, bluish violet witb large blue center.
Jeanne d'Arc. A superb late-flowering pure white.
Le Pole Nord. White, with crimson eye. One of the best tall late-blooming varieties.
Mad. Meuret. Flame-color, changing to rich salmon. One of the best.
Mad. Pape Carpentier. Immense white Howers of beautiful form.
Pantheon. Deep salmon-rose. A very beautiful variety.
Richard Wallace. Tall-growing variety; flowers white with violet-red center.
Saison's Lierval. Large white flowers with deep rose eye. Very vigorous grower.
'Terre Neuve. A very bright red, striped white.
Wolfgang von Goethe. A beautiful deep rose with white eye. A valuable acquisition.

## HARDY POPPIES (Papaver)

Nudicaule (Iceland Poppy). A beautiful race and among the most desirable of our herbaceous plants. The plant forms tufts of fern-like foliage, from among

ORIENTAL PORPY

hardy phlox, graffin von lassburg
which the slender flower-stocks rise to about a foot in height and bear fragrant cup-shaped tlowers. The profusion of blooms which they produce is astonishing, often a hundred flower-stems on a single plant, and they are produced from the beginning of June till October. They will thrive on any good garden soil. doing especially well in a sunny location. We offer them in the following colors: Scarlet, white and yellow. Each, 15 cts.; doz., $\$ 1.50$.
ORIENTALE (Oriental Poppy). The common variety. The flowers are a bright scarlet, with a black blotch at the base of each petal, and when in bloom in the spring they make a very brilliant display. Each, 15 cts.; doz., $\$ 1.50$.
Oriental Hybrids. The following named varieties are among the best of the Oriental Poppies and give quite a wide range of color. Each, 25 cts.; doz.. $\$ 2.50$.

One of our showiest and most stately perennials. Thrives best on light sandy soil. 3'to 4 feet. June and July. Each, 15 cts.; doz., $\$ 1.50$; large clumps, each, $25 \mathrm{cts}:$ : du7.. *2. 20.

## ROSES <br> OUR SPECIALTY

## Hybrid Perpetuals, Climbers and Moss Roses

It is our sincere belief that the best time for buying Roses is in fall

We do not recommend planting then, but advise digging a trench 2 to 3 feet deep and heeling-in these plants, permitting 6 to 9 inches of the top growth to protrude above the surface. This we find an absolutely safe method of winteriug Roses. In fall we can fumish Roses that are positively alive, while in spring, at the time we ship our bushes, the plants are dormant and their reviving is uncertain.

We wish particularly to call the attention of our friends residing in Maine, New. Hampshire and Vermont to the above article. Very frequently in spring we receive orders for Roses and shrubs to be shipped in June or July. As the plants are then in leaf, it is impossible to ship and consequently a disappointment follows. A fall purchase would produce successful results.

The Roses listed on the following pages are the very best that can be selected from their
 various classes. Many of the varieties are grown especially for us in England, where great care is taken to have them true to name, and of strong and vigorous growth. During the past few years our Rose trade has increased wonderfully, which in itself is evidence of the superior quality of the plants that we send out. We grow enormous quantities of Hybrid Perpetuals, Teas, Ramblers, etc., thus enabling us to give our customers choice selected bushes of clean and vigorous growth.

## Hybrid Perpetual Roses

These are strong, field-grown flowering plants, and can be sent only by express or freight, and must not be compared with the small plants from pots that are usually sent by mail. They are worked low on Manetti stock and will bloom first season of planting. In planting

MRS. JOHN LalNG (See page 54) worked Roses, bave the budded part set 2 to 3 inches below the surface of the ground, and the soil pressed firmly about the stem. By bringing the budded part above the surface, the plant is liable to winter-kill; this is the cause of a great deal of the loss from worked plants. For winter protection, draw the soil about a foot high about the plants, or even more if convenient. Manure can be put on for additional protection. It need not be rotted; green will answer just as well, and covered under in the spring.

## THE BOSTON COLLECTION 12 CHOICE HARDY ROSES

The following 12 varieties are selections of the best known Roses of today, having been thoroughly tried in this latitude and found all that the most critical grower conld demand, and embrace a great variety of colors.
Price for extra strong 2-year-old plants, each, $30 \mathrm{cts} . ;$ doz., $\$ 3$; $100, \$ 20$, or the set of 12 for $\$ 3$
ALFRED COLOMB. Rich red, very large and globular, free-blooming and fragrant. A grand Rose for the garden.
BARONESS ROTHSCHILD. Very beautiful pale rose; superb form; splendid foliage. One of the handsomest popular Roses. Excellent late variety.
DUKE OF EDINBURGH. Very bright vermilion, extra large and full. A distinct and splendid variety.
FRAU KARL DRUSCHKI. Undoubtedly the finest pure white Rose in existence. Color a pure snow-white, very long buds, shell-shaped petals opening to very large flowers. A continuous and exceedingly free bloomer. A variety regarded as first-class in every respect.
LA FRANCE. Flowers large and beautiful either in bud form or when expanded; peach-blossom color, shaded pink and silvery rose. It is very free-blooming, every shoot forming a beautiful flower and most deliciously fragrant.

THE BOSTON COLLECTION OF ROSES, continued MERVEILLE DE LYON. A beatatiful white voariety, with center slightly tinted rosy peach. A grand, full cup-shaped tlower.
MME. GABRIEL LUIZET. Light silvery pink; grand flower; free blooner; fragrant; hardy plant.
MRS. JOHN LAING. Soft pink; large, fine form; a good grower; abundant bloomer late in the season. MRS. R. G. SHARMAN-CRAWFORD. Cleur rosy pink, the outer petals shaded with pate flosh. Very free-Howering, and one of the best Roses for all purposes.

PAUL NEYRON. The largest-flowered in cultivation, and one of the most mrolific bloomers: color deep, clear rose; very fresh und attractise. The plant is au exceptionally good grower.
PRINCE CAMILLE DE ROHAN. Deep relvety crimson-maroon, full and ot superb form. Generally cousidered to be the best of the dark Roses.
ULRICH BRUNNER. Cherry-crimson: large size; fise form ; effective in the gardlen or for exhibition; a goorl forcing Rose; semi-duuble: it seems proof against mildew and rust; it blooms early and continuously.

## Standard List of Hybrid Perpetuals and Hybrid Teas

The following varieties are strong field-grown plants and bare proven themselres of exceptional merit for fall planting, especially in this climate. Those marked H . P. are bybrid perpetuals. Those marked H. T. are hybrid Teas.

Price, except where noted, each, 30 cts. ; doz. $\$ 3 ; 100, \$ 20$. Not less than 6 at dozen rate

Anna Diesbach. H. P. A fine, large-flowering variety of a beautiful deep pink.
Caroline Testout. H. T. A beautiful light salmonpink and one of the best everblooming summer Roses.
Etoile de France. H. T. Rich velvety crimson, with red-cerise center. Fine long bud coming singly on long stiff stems. Flowers are of fine substance and very free. Each, 40 cts. ; doz., $\$ 4 ; 100, \$ 30$.
General Jacqueminot. H. P. One of the best known of the dark red roses. A mass of bloom when at its best.
Gruss an Teplitz. H. T. Bright erimson, with fiery red center. Flowers borne in clusters. Very freeblooning and bardy. One of our best bedding Roses. Each, 40 cts.; doz., $\$ 4 ; 100, \$ 30$.
John Hopper. H. P. A handsome bright rose with reverse of petals lilac. Very large and double.
Magna Charta. H. P. Magnificent tlower of a beautitul bright pink. Very strong grower with handsome foliage.

CRLMSON RAMBLER RUEE

Marchioness of Londonderry. H. P. Irory-white petals of great sabstance. Flowers of great size aud perfect globular form.
Margaret Dickson. H. P. White, with pale flesh center. Petal very large; magnificent formand spleadid growth.
Mons. Boncenne. H. P. A very popular old Rose of a relrety blackish crimson. Fine form and quite large.
Senateur Vaisse. H. P. Fine dazzling red, large and double, of tine form. Very free bloomer.
Tom Wood. H. P. Cherry-red; large, shell-shaped petals, good form and large size.

## Baby Rambler <br> A Wonderful New Rose

One of the most raluable acquisitions in recent years. It is practically the famous Crimson Rambler in a dwarf form, and possessing the same qualitications as its predecessor, namely, its great protusion of rich crimson flowers in clusters, its hardiness and exceptional vigor of growth, succeeding in almost any location. But its principal claim for superi. ority is its remarkable continuity of bloom. With the Baby Rambler, Roses may be had from June till late frost, and it is well adapted for forcing and outdoor culture. Strong, 2-year old plants, each, 50 cts. doz., \$5.. Extra-strong selected plants, each, 75 ets. to $\$ 1$.

## Hardy Climbing Roses

Price, except where noted, each, 40 cts ; doz., $\$ 4$
Dorothy Perkins. A new rariety of Pink Rambler, and rivaling the Crimson Rambler in vigor of growth and freedom of bloom. Countless clusters of double pink flowers of a most beautiful shade. Is very hardy. Strong selected, dormant plants, each, 50 cts ; doz., $\$ 5$.
Crimson Rambler. The finest climbing Rose in existence. Unequaled for hardiness, vigor of growth, profusion of bloom and brilliancy of color. Flowers are double, of a bright crimson and borne in immense clusters during June and July. Extra strong, 2-year-old plants, each, 50 cts.; doz., $\$ 5$. Extra selected, 3- to 4 -year-old plants, each, 75 cts . to $\$ 1.50$.
Yellow Rambler. Of similar habit to the Crimson. Flowers are very double, of a decided yellow and very sweet-scented. The flowers are borne in immense clusters, there often being as many as 150 blooms in a cluster. Very bardy, standing our sererest winters. Extra strong, 2-year-old, field-grown plants, each, 40 cts, ; doz., \$4. Extra selected, 3 -ur 4 -vear-old plants, each, 75 cts. to $\$ 1$.
White Rambler. Resembles the Iellow Rambler, excepting color, which is a pure white. Extrastrong, 2-sear-old plants, ea., 50 c . ; doz., $\$ 5$.

SOLEIL D'OR

## HARDY CLIMBING ROSES, continued

Pink Rambler. Like the white, this resembles the yellow excepting as to color. Extra strong, 2 -year-old plants, each, 50 cts.; doz., $\$ 5$.
Baltimore Belle. Blush; flowers in clusters. Each, 40 cts.; doz., $\$ 4$.
Carmine Pillar. Single flower, bright rosy carmine. A free bloomer, the flowers produced all up the stems. Especially good for pillars, arches, etc. Each, 40 cts.; doz., $\$ 4$.

## Moss Roses

Blanche Moreau. Pure white, large and full, perfect form. Flowers in clusters, perpetual blooming.
Crested. Pale pink, very double, the edges of petals paler.
Glory of Mosses. Pale rose, large, full and fine bloomer.

Price of above, 30 cts . each, $\$ 3$ per doz.
Rosa rugosa (Japan Rose)
Excellent for planting in shrubberies, as they make large bushes and the brilliant scarlet fruit-pods are very handsome and attractive.
Alka. Single pure white flowers, large and very sweet.
Rubra. Similar to the Alba in habit. Deep rose, shaded violet.
Mad. Georges Bruant. Large, semi-double, pure white.
Price of above varieties, 30 . each, $\$ 3$ per doz., $\$ 20$ per 100

## Sweetbrier Roses

Valuable for the refreshing fragrance of their leaves. They are perfectly hardy and require little care. Do well in either sun or shade.
True English Sweetbrier. Pale pink foliage, deliciously fragrant. Flowers single. 30c, ea., $\$ 3$ per doz.

Double Scarlet. Rosy-red, bright double flowers and very sweet. Euch, 40 cts. ; doz., 串4.
Double White. Fleshy, white and very pretty. Very fragrant. Each, 40 cts.; doz., $\$ 4$.

## Austrian Briar Roses

Soleil d'Or. A recent introduction, and indispensable where a hardy yellow Rose is desired. Color from orange-yellow to old-gold.
Harrison Yellow. Golden yellow; semi-double.
Persian Yellow. Very donble and of deepest yellow. Price of above varieties, each, 35 cts.: doz., $\$ 3.50$

## Miscellaneous Roses

Cabbage, or Centifolia. A great favorite in old gardens. Color a clear rosy pink; very fragrant. Each, 30 cts.; doz., $\$ 3$.
Mad. Plantier. A pure white Rose and a very free bloomer. Haxdy and excellent for massing. Each, 35 ets.; doz., \$3.50.
Rosa Carolina (Swamp Rose). A tall-growing, single pink variety, with showy bright red fruit. Will bloom from June to September. Each, 25 cts.; doz., \$2.50.
Rosa setigera. A most vigorous Rose of climbing habit. Covered with bright rose-colored flowers, borne in July. Each, 30 ets.; doz., $\$ 3$.
York and Lancaster (Damask Rose). One of the oldest Roses. Large red and white striped flat flowers. Very vigorous. Each, 40 cts.; doz., $\$ 4$.

## We are Headquarters for DAHLIAS

Our Collection is the Largest in the World

MAGNA CHARTA (see page 54)

## Hardy Ornamental Shrubs

ALMOND, Double Pink. 4 feet high. Each, 50 cts. Double White. Each, 50 cts.
ALTHEA (Rose of Sharon). Double White, Double Red, Variegated. Price for ahove raricties, each, 35 cts , and 50 cts ., according to size.
AZALEA mollis (Chinese Azalea). In four colors, red, pink, white and yellow. Fine bushy plants, with 20 to 30 buds, each, 75 e.; doz., $\$ 7.50$.
Pontica (Ghent Azalea). Large-flowering plants in orange, pink, red, white and yellow, ea., $\$ 1$; doz., $\$ 10$.
BERBERIS (Barberry) Vulgaris purpurea, Thunbergii. Specimen plants of above, each, 35 cts.: doz., $\$ 30$.
Thunbergii for hedges, 2 -year-old plants, doz., \$2; 100, $\$ 12$. Extra strong, 3 -year-old, doz., $\$ 3 ; 100$. $\$ 18$.
CALYCANTHUS floridus. Each, 25 cts. to 50 cts .
DESMODIUM penduliflorum (Sweet Pea Shrub). Each, 35 cts, ; doz., \$3.50.
DEUTZIA crenata. Each, 35 cts , to 50 cts . Gracilis. Each 25 cts. to 50 cts.
Watereri. Each, 50 cts.
ELAEAGNUS longipes. Each, 35 cts ., to 50 cts .
EXOCHORDA grandiflora. Each, 35 cts. and 50 c .
FORSYTHIA Fortunei (Golden Bell). Each, 35 cts. and 50 cts.
Suspensa (Weeping Golden Bell). Each, 35 cts and 50 cts .
GOLDEN ELDER. Each, 35 cts , and 50 cts .
HYDRANGEA paniculata grandiflora. Strong 2 -year-old plants, each, 25 cts.: doz., $\$ 2.50$. Extra selected, 3- to 5 -year old plants, each 50 c . to $\$ 1.50$.
HYDRANGEA, TREE. Each, 75 cts .
HONEYSUCKLE BUSH (Lonicera fragrantissima). Each. 3.5 cts . and 50 cts .

HYPERICUM aureum. Each, 35 cts . and 50 cts . JAPAN QUINCE. Each, 25 ets, and 50 cts.
JAPAN SNOWBALL (V'iburnum plicatum), Each. 50 cts . to $\$ 1$, according to size.
KERRIA Japonica. Each, 25 cts . and 50 cts.
Japonica fl. pl. Each, 25 cts and 50 cts .
Japonica variegata. Eacl, 25 cts. and 50 cts .
LILAC, Purple. Each, 35 cts . to 50 cts . and \$1, ac cording to size.
White. Each, 35 cts. and 50 cts.
MAGNOLIA Soulangeana. Each, $\$ 1.50$ and $\$ 2$.
PRIVET, California. The favorite shrub for hedges, 18 to 24 inches high. Doz., $\$ 1 ; 100$, \$6. 2 to 3 feet higb, doz., $81.50 ; 100, \$ 8.3$ to 4 feet high, doz.. $\$ 2 ; 100, \$ 12$.
PRUNUS PISSARDI. Each, 35 cts and 50 cts .
RIBES aurea. Each, 35 cts , and 50 cts .
SMOKE TREE (Rhus cotinus). Each, 25 c , and 50 c .
SPIRAEA, Anthony Waterer. Strong plants, each. 25 cts . and 50 cts.
Thunbergii. Each. 25 cts, and 35 cts.
Van Houttei. Each, $2 \overline{5} \mathrm{cts}$. and $\overline{50} \mathrm{cts}$.
SYRINGA coronarius. Each, 35 cts . and 50 cts .
Grandiflora. Each, 35 cts, and 50 cts.
Foliis aureis (Golden Syringa). Six to 8 feet. Each, 35 cts. and 50 ets.
VIBURNUM Opulus. Each, 35 cts , and 50 cts .
WEIGELA candida. Each, 25 cts . and 50 cts.
Rosea, Each, 25 cts. and 50 cts .
Rosea variegata. Variegated foliage. Each. 25
Crimson. Eacl. 25 cts. and 50 cts.
WHITE FRINGE TREE. Each. 35 cts and 50 cts .

## HARDY CLIMBING VINES

AMPELOPSIS Veitchii. The well-innown Boston Ivy. Each, 25 cts.; doz., $\$ 2.50$.
CLEMATIS paniculata. Small plants, each. 25 ets.; doz., $\$ 2.50$. Large plants, each, 50 cts.; doz., $\$ \overline{0}$. Extra size, each, \$1.
Jackmani. Strong 2 -year-old plants, eack, 50 cts.; doz., $\$ 5$.
Jackmani alba. The largest flowering white variety. Each, 50 cts . doz., $\$ \overline{5}$.
HONEYSUCKLES, Belgian (The Dutch Monthly Honeysuckle). Very fragrant. Each, 35 cts.
Halliana (Hall's Evergreen). Each, 25 cts.; doz., \$2.50.
WISTARIAS, Chinese Blue. The most popular Wistaria. Flowers in May and August. Pale blue in color and very showy. Each, 50 cts,; doz., $\$ 5$.
Chinese White. A white flowering form of above. Each, 50 cts.; doz., $\$ 5$.
Multijuga. A Japan variety, with dark purple racemes ofteu 2 to 3 feet long, Each, 75 cts.; doz., $\$ 7.50$.

## Other Hardy Climbers

AKEBIA quinata. Each, 50 cts.
AMPELOPSIS quinquefolia. The common Woodbine. Each, 25 cts. ; doz., $\$ 2.50$.
ACTINIDIA polygama. Each, 50 cts.
ARISTOLOCHIA Sipho (Dutchman's Pipe). Each, 75 cts.
BIGNONIA, or Trumpet Flower. Each, 35 cts.

Chinese wistaria

## VIOLETS

## For Coldframes or Greenhouses

The plants we offer are grown by an expert with special care, and are clean and healthy. We shall ship only extra-strong clumps, which no doubt will give spleudid results.

Each, 20 cts.; doz , \$2; 100, \$15
Princess of Wales. The peer of single Violets; color deep blue; flowers very large; leaves robust and of good size.
Lady Hume Campbell. A very pretty double Violet; color mauve; very free-flowering; leaves glossy and medium.

## STRAWBERRIES

The following varieties are ready for immediate delivery in strong pot-grown plants, which, if set out in September or early October, will make strong fruiting plants next June and July.

Doz., 50 cts.; 25, $\$ 1 ; 50, \$ 1.75 ; 100, \$ 3 ; 1,000, \$ 25 ; 500$ at 1.000 rate
Those varieties marked imperfect require a perfect variety to fertilize them.
Marshall. A variety unsurpassed for vigor of growth, size of berry and productiveness. By far the best all-round berry for home and market use. Fruit large, of a deep red color and of superior quality. Ripens fairly early and lasts till after midseason.
Belmont. Perfect. Large crimson; late; productive.
Brandywine. Large, dark crimson; late; extra fine.
Commonwealth. Perfect. Large, crimson; very late.
Excelsior. Perfect. Earliest of all; rather small and productive.
Glen Mary. Perfect. Very productive; large; late.
Minute-Man. Imperfect. Very soiid, fine, large berry.
Sample. Imperfe:t. Quite large scarlet; late.
Senator Dunlap. Perfect. Largo, early rich red.
Tezas. Perfect. Crimson; early; fine shipper.

## Hardy Evergreen Trees

We offer a specially fine stock of the following varieties. They are all tbrifty and heavily rooted, having had their ronts pruned and transplanted several times. ()n all orders for Evergrecnis we make special shipments, as We do not think it advisable to pack wit'」 other plants. Evergreens may be lifted safely during April and Mar, and during wet spells in August and September.
ABIES balsamea (Balsam Fir). 2 to 3 ft ., each, i5 ets.: doz.. \&7.50.
Canadensis (Hemlock). 3 to 4 ft .. each, $\$ 1.50$.
Nordmanniana (Nordmann's Fir). 2 to $21 / 2 \mathrm{ft}$., each, $\$ 2.50$.

PINUS Austriaca (Austrian, or Black Pine), 3 to 4 ft., each, \$1.
Strobus (White Pine). 3 ft., each, \$1; doz., \$10; 5to 6 -ft. specimens, each, $\$ 1.50$.
sylvestris (Scotch Pine). 3 to 4 ft ., each, 81 : doz. $\$ 10$.
RETINOSPORA filifera (Thread-branched Crpress). Each, $\$ 1.2 \overline{2}$; specimens, 4 to $5 \mathrm{ft} ., \$ 5$ to $\& 8$. obtusa. Very compact; dark green foliage tiuted bronze. 3 to 4 ft ., each, $\$ 2.50$.
plumosa. Fine light green foliage. 2 to 3 ft ., each, $\$ 1: 3$ to 4 ft., each, $\$ 1.50$.
plumosa aurea. A goklen-leared form of abore. 18 to 24 inches, each, $\$ 1$; 24 to 30 inches, each, $\$ 1.50$.
SCIADOPITYS verticillata (U'mbrella Pine). $21 / 2$ to 3 ft ., each, $\$ 3 ; 4-\mathrm{ft}$. specimens, each, $\$ 6$.
THUYA occidentalis (American Arborvitæ), 3 to 4 ft., each, 50 cts . ; 5 to 6 ft ., each, $\$ 1$.
occidentalis aurea (Golden Arborvitæ). 2 to $21 / 2$ ft., each, $\$ 1.50$.
occidentalis pyramidalis. 3 to $31 / 2 \mathrm{ft}$., each, $\$ 1$.
occidentalis Sibirica. 2 to $21 / 2 \mathrm{ft}$., each, 75 cts.

## Hardy Grapes

Strong, selected plants, each, 25 cts.; doz., $\$ 2.50$, except where noted

## BLACK

Concord. The first and best Very large bunch, bearing good-sized berries, covered with bloom; always reliable and very productive. Bears in September. Each, 20 cts.; doz., $\$ 2 . ;$ extra strong, each, 35 cts.
Moore's Early. Resembles the Concord but ripens nearly two weeks earlier. Very productive. Each, 30 cts.; doz., $\$ 3$; extra strong, each, 50 cts.
Worden. Very productive; a little earlier than the Concord. Ripens in August. Extra strong. Each, 30 cts.

## Fruit

APPLES-Baldwin, Fameuse, or Snow, Gravenstein, McIntosh Red, Northern Spy, Red As trachan, Rhode Island Greening, Russet, Tolman Sweet and Williams' Favorite. First size, each, 50 cts ; doz., $\$ 5$; extra size, each, $75 \mathrm{cts}$. ; doz., $\$ 7.50$.
CRAB APPLES-Hyslop and Transcendent. 5 to 7 ft ., each, 50 cts. ; doz., $\$ 5$.
CHERRIES-Black Tartarian, Early Richmond and Windsor. 5 to 6 ft ., each, 75 cts : dez., $\$ 7.50$.

## RED

Catawba. Very prolific. Long branches. September, Delaware. One of the sweetest Grapes. Berries very small, in compact bunches. A very productive variety.

## WHITE

Green Mountain. The best early white grape. Late August. Each, 50 cts.
Niagara. Handsome berries of the finest flavor.
Pocklington. Large, compact bunch, large berries corered with white bloom; flesh sweet.

## Trees

PEACHES-Champion, Crawford's Early, Craw. ford's Late, Elberta, Oldmixon and Stump the World. 4 to 5 ft ., each, $30 \mathrm{cts} . ;$ doz., $\$ 3$.
PEARS-Anjou, Bartlett, Clairgeau, Clapp's, Dana's Hovey, Seckel and Sheldon. 5 to 7 ft ., each, 75 cts.: doz.. $\$ 7.50$.
PLUMS-Abundance, Bradshaw, Burbank and
Lombard. 5 to 7 ft ., each. 75 cts .: doz., $\$ 7 . \overline{5} 0$.
QUINCES-Champion and Orange. 3 to 4 ft ., each, 50 cts.: doz., $\$ 3$.

## Vegetables for Hothouse Forcing

Our strains of hothouse regetables are world-renowned, every seed saved for stock is selected by Mr. W. W. Rawson personally, and we dare claim that no superior strains are offered anywhere in the world.

## BEANS

Triumph of the Frames. Only suitabie for forcing. and is ideal for this purpose. Of very dwarf habit; a prolitic bearer and extra early. Beans rery tender and of the "Flageolet" flavor. Of French origin, and our seeds come direct from the introducer. Pkt., 25 cts.; pt., $50 \mathrm{cts} . ; q t ., 75 \mathrm{cts}$.

## BEETS

Crosby's Improved Egyptian (Arlington-grown). The stock that we offer is Mr. Rawson's personal selection and grown at our seed farm under Mr. Rawson's supervision. Therefore, we have no hesitancy in claiming it as the finest and truest strain of Crosby Eggptian to be had. This variety is probably sown more than any other for an early Beet, as it reaches the desired size in much shorter time. The Beets are of good size, rather flat than round and flesh dark. Also used largely for forcing in hotbeds. Pkt., 10c.; oz., 15 cts.; 4 ozs., 35 cts.; 1b., $\$ 1.23$.

## CARROT

French Forcing. An extremely early forcing variety; root globular, small reddish orange in color and of the sweetest flavor known. Pkt., 5 cts.; oz., 10 cts.; 4 ozs., 25 cts.; lb., 90 cts.

## CUCUMBER

Rawson's Hothouse. The finest strain of Cucumber for forcing and outdoor planting in existence. It is an improvement on Rawson's White Spine, the fruit being two inches longer and darker green in color. We have attained this result by years of selection, and feel confident that this strain cannot be equaled in this country. The great number of complimentary letters we have received warrant us in making the above claim, and we can not recommend it too highly. Pkt., 25 cts.; $1 / 20$ z., 60c.; oz., $\$ 1 ; 4$ ozs., $\$ 3 ; 1 \mathrm{lb} ., \$ 10$.
Rawson's White Spine. A very superior strain for forcing and outdoor planting, that up to the time of our sending out Rawson's Hothouse was considered the best to be had. Fruit very even in size and regular in form; color dark green, with white or light spines running from blossom end. Pkt., 10 cts.; oz., 50 ets.; 4 ozs., $\$ 1.50$; lb., $\$ 5$.
Arlington White Spine. An extra selected strain of White Spine, selected with a view to obtain evenness of size, form and color of forcing in frames. This strain we consider by far the finest for growing in hotbeds. Pkt., 10 cts ; O\&., $25 \mathrm{cts} ; 4 \mathrm{ozs}, 75 \mathrm{cts}$. lb., \$2.50.

## LETTUCE

Rawson's Hothouse. The lafgest and best plainleaf variety for forcing. A very choice selected strain of our own selection, adapted for hothouses and hotbeds only. Heads enormous in size, sure to head and not liable to rot in the heart. This variety is probably grown more than any other by the market-gardeners of Boston and vicinity, who are famous for the superior quality of their Lettuce. Pkt., 15 ets.; oz., 50 cts.; 4 ozs., $\$ 1.50 ; \mathrm{lb} ., \$$.

## LETTUCE, continued

Rawson's Crumpled Leaf Hothouse. A superior variety introduced by us a few years ago and is unsur. passed for forcing when a large, quick-growing head is desixed. Jcaves are dark green, slightly ruffled or crumpled and very crisp and tender. Heads very large, sure to head and perfectly free from decay in the heart. Should be grown cool to get the best results and planted 8 inches apart in the bed. Unequaled for shipping and will easily pack three dozen to a long box. Pkt., 25 cts.; oz., $60 \mathrm{cts} . ; 4 \mathrm{ozs} .$, $\$ 2$; lb., \$7.

## LETTUCE PLANTS

At rarious times during the winter season we can furnish joung hothouse-grown plants of the ahove varieties of Lettuce, just in proper condition for final transplanting. Orders may be sent at any time and will be filled whener re the plants are ready. Doz., $2 \bar{j}$ ets.; 100, $\$ 1.50 ; 1,000, \$ 12$.

## MUSHROOM SPAWN <br> One brick sufficient for about one square yard

Pure Culture Spawn. Made in the United States by improved method, and is much more reliable, more prolific and earlier than the English Spawn. In fact, it has attained such remarkable success that it is rapidly taking the place of English Spawn amongst the larger growers. We issue a circular giving complete cultural directions with every order for Spawn. Bricks (weighing about $11 / 2$ pounds), each, 25 cts ; doz., $\$ 2.50 ; 25, \$ 4 ; 100, \$ 15$, or $\$ 10$ per 100 lbs , pur. chaser paying transit. If by mail, add 10 cts. perbrick for postage.

## RADISH

Rawson's Scarlet Conical. This variety is one of our finest specialties, and for forcing we are sure it cannot be equaled. For the brilliant scarlet color, short top and uniform shape and size of the Radishes it is unexcelled. In flavor it is all that can be desired, being very tender and crisp. Pkt., 5 cts.; oz., 15 cts.; $4 \mathrm{ozs} ., 40$ cts.; lb., $\$ 1.25$.

## TOMATO (FORCING)

Stirling Castle. A very superior variety for either forcing or outdoor culture. Very heavy cropper, of medium size, smooth and round. Color a clear red. Remarkable for its freedom of set and delicious flavor. Our strain of this is the finest to be had. Pkt., 25 cts.; oz., $\$ 2.50$.
Best of All. Considered by many to be the equal of any other variety in the quality of fruit and productiveness. Deep scarlet; a strong grower and producing the rery solid Tomatoes in bunches. Plst., 10e.; $1 / 2 \mathrm{oz} ., 25 \mathrm{cts} . ;$ oz., $40 \mathrm{cts} . ; 4 \mathrm{ozs} ., \$ 1.50$.
Comet. A recent variety, matchless in form and color. Beautiful, smooth, round fruit in great abundance. Color a rich scarlet-red. Sets very freely in bunches. Equally good for outdoor culture as for forcing. Pkt., 25 cts.; oz. $\$ 2$.
Lorillard. An old forcing variety of great merit, and still used extensively. Unrivaled for color, form and solidity. Very free producer. Pkt., 10 cts.; oz., 30 c.; 4 ozs., \$1.

# Rawson's High-Grade Fertilizers <br> WE DO NOT DELIVER ANY FERTILIZERS THESE CAN BE SHIPPED BY EXPRESS OR FREIGHT ONLY 

## Our prices are net $\mathrm{f} . \mathrm{o}$. b. cars Boston. The prices of fertilizers fluctuate frequently, and we reserve

 the right to change same without notice
#### Abstract

"Wizard Brand" Pure Pulverized Sheep Manure We are sole distributers for Boston and vicinity of the above brand of sheep manure, which is absolutely the only pure brand is the market today which is carefully selected, shredded, kiln-dried, screened, passed over strong magnets, pulzerized and packed in bags ol barrels. Pure sheep manare is the best and strongest in fertilizing and enriching elements of all nature's fertilizers, containing, as it does, nitrogen, phosphoric acil, ammonia and potash in liberal proportions. It is three times stronger than cow manare. The name "Wizard" stands for absolutely the best in quality, purity and uniformity. Sheep manure is excellent for lawns, railroad stations, golf greens, general garden, flower b-ds, house plants, trees, hothouses, public parks, fruits and all farm products. Lb., 10 cts $5 \mathrm{lbs}, 25 \mathrm{cts}, ; 10 \mathrm{lls} ..40 \mathrm{cts} . ; 25 \mathrm{lbs} ., 75 \mathrm{ets}:. 50 \mathrm{llss}$. $\$ 1.25 ; 100 \mathrm{lbs} ., \$ 2$; ton (in $100-\mathrm{Ib}$. bags), $\$ 35$; full large barrel, 4.

## Rawson's Lawn and Garden Dressing

A combination chemical fertilizer which is unequaled for either lawn or garden; it is dry and powdery and can easily be applied by any one. This is not only a stimulant to vegetation, but transfers to the plant a lasting healthy appearance. We put up this fertilizer in convenient sizes, so that every one might use it.

Ton (2,000 lbs.) in $100-1 \mathrm{~b}$. bags. .................. 5000

## Rawson's Special Lawn Dressing

This preparation is gotten up especially for enrich ing lawns, and contains only such elements as are beneficial for grasses. For the benefit of our customers who have but a small lawn or a front or back yard, we offer this excellent fertilizer in convenient sizes as follows:

Pure Canada Unleached Hardwood Ashes
Ashes contain potash and lime, which are not only essential to the plant, but also sweeten the soil and
dissolve other plant-food ingredients. Potash aud linse are nature's plant-food. These things have been extracted from the soil by the trees, and now we return them in the shape of ashes. Pure wood ashes is one of the best fertilizers for top-dressing lawus, grass lands and seeding down, also for fruit of all kinds, escecially strawberries, peaches and apples. When used on lawns it imparts a rich dark shade of green, destroying insects and bad weeds, particularly moss, which is so common on lawns. 25 lbs., 50 cts.; $50 \mathrm{llbs.}$,75 cts.; 100 lbs. $\$ 1.25 ; 200 \mathrm{lbs}$, in $2100-\mathrm{lb}$. bags), $\$ 2$; ton (2,000 lbs.) in $100-1 \mathrm{~b}$. bags, $\$ 16$.

In carload lots of from 15 to 25 tons, at $\$ 11.50$ mer ton in bulk or $\$ 13.50$ per ton in 100-1b, bags, delisered at any freight station in Massachusetts, Vermont, New Hampshire, Rhorle Island, Connecticut and to auy station in Maine, except points of the Mane Central Ruilroad.

Fine Ground Bone. Our bone is made of the best quality of bone and finely pulverized. It is absolutely pure and contains every ingredient, without extraction. It is excellent for lawns, trees, shrubs, roses, flower-beds and general gardens, particularly good for perennial borders. 5 lbs ., 25 cts.; $10 \mathrm{lbs.}$,40 cts. : 25 lbs., $75 \mathrm{cts} . ; 50 \mathrm{lbs},. \$ 1 ; 100 \mathrm{lbs},. \$ \mathrm{l} .80$; ton $(2,000$ lbs.), \$30.
Tobacco Stems Fertilizer. Tobacco stems are morth about four times as much as an equal weight of stable manure. They can be spread and plowed under like ordinary manure, or worked into compost heap. They make a good mulch to put around fruit trees and are good around such crops as melons and squashes. Per bale of about 100 lbs ., $\$ 2$.
Land Plaster. Excellent for composting, fertilizing, also used for preveuting bugs from destroying cucumber, melon and squush vines. 5 lbs., 20 cts.; 25 lbs., 50 cts.; 100 lbs., $\$ 1$; bbl. of 350 lbs., $\$ 2$.
Nitro-Culture Lime. This article supplies a great want in gardening today. We depend almost entirely on it, to enable us to raise certain flowers and vege tables. Without it their cultures are failures. Most prominent of these are cucumbers, squashes, asters and sweet peas. Its mainqualities are that it sweetens and purifies the soil. It should be applied early in spring and also late in fall. It will help in great measure to destroy the obnoxious cutworm. Liberal quantity should be applied, as it is not injurions no matter how much you put into the ground, only beneficial. $100-\mathrm{lb}$. bag, $\$ 1$; ton, $\$ 18$

All other fertilizers not listed here we can furnish, and we solicit correspondence.

## VARIOUS MATERIAL FOR POTTING

Sterilized Potting Soil. This soil has been put to $270^{\circ}$ of heat, which absolutely destroys all insects or fungous growth in the soil and is fertilized sufficiently for growing all kinds of plants. This soil is from our greenhouses in Arlington and the same as we use in growing of all our plants. $1 / 2 \mathrm{pk} ., 20 \mathrm{cts}$; pk. 30 cts.; bus., $\$ 1$; bbl., $\$ 2$.
Rotted Fibrous Peat. This has become thoroughly rotted, and is inraluable for potting plants. $\quad 3 / 2 \mathrm{pk}$.. 20 cts.; pk., 30 cts.; bus., $\$ 1$; bbl., $\$ 2$.

Leaf-Mold. Is very essential for growing plants. 1/2pk., 20 cts.; pk., 30 ets.; bus., $\$ 1$; bbl., $\$ 2$
Orchid Peat, or Fern Root. Bbl., $\$ 2.75$; bus., $\$ 1.50$.
Sphagnum Moss. We can furnish at almost any time of year, freshly gathered or dry. Bus., 75 cts.; bag., \$1.50.

Silver Sand. For mixing with soil for bulbs. Qt., 10 cts. ; pk., 50 ets.; bus. $\$ 1.50$.

PEBBLES. For growing Chinese Lilies or Paper-White Narcissus. Qt., 15 cts.; pk., $\$ 1$; bus., $\$ 3.50$.
SULPHO-TOBACCO SOAP. Should be used freely on all house plants during the winter. By spraying plants thoronghly once a week, it will not only act as a preventive of insects, but also a good fertilizer. Per 3-oz. package, sufficient to make one gallon liquid, 10 cts ; ; $8-\mathrm{oz}$. package, sufficient to make three gallons liquid, 20 cts. If wanted by mail, add 5 cents for the $3-o z$ and 10 cents for the 8 -oz package.

# Weedy Lawns Transformed into a Beautiful Sward by a Single Application of CLIMAX LAWN SAND 

This remarkable preparation, when applied to weedy lawns, will adhere to the rough, hairy leaves of Dandelions, Plantains, ete., and, by absorbing therefrom all the sap, destroy them beyond recovery. Moreover, Climax Lawn Sand goes to the roots of smooth-bladed finer grasses and acts as a valuable fertilizer. The most weedy and impoverished lawn will show a remarkable improvement after a single application.

> We have carried on extensive experiments near Boston and are absolutely convinced that the abobe statement is the exact truth.

## THE CLIMAX LAWN SAND

absolutely destroys Dandelions, Plantains, and any other broad-leaved weed with hairy surface, on the lawns, at the same time promoting the growth of the finer grasses and adding to the beauty of the lawn.

By its use, the most weedy and impoverished lawn, golf ground, tennis court, bowling green or putting green is quickly transformed into a perfect sward of fine grass without the aid of any other fertilizer.

## DIRECTIONS FOR USE

Apply during bright, dry weather. The grass should be cut previous to application. To Dandelions and Plantains, apply a heaped teaspoontul or more to each of the crowns, according to the size of the weeds. For Chickweeds and Moss, apply with the hand, distributing evenly about five ounces for every square yard. Gauge the quantity according to the number of weeds. Repeat the application if any escape the first dressing. The weeds soon wither and disappear. The grass around will be browned a little but will soon recover and develop an improved growth, quickly covering the patch left bare by the disappearing weeds. Apply in dry weather; the hotter the weather the quicker the weeds are killed. Should the weather continue dry beyond 48 hours after application, the grass should be lwell watered.

## WHEN TO APPLY

March, April, May, July, August, September and October are the best months, selecting a bright sunny day, with a prospect of 24 to 48 hours settled weather.

When Climax Lawn Sand is applied, no other manure is required.

## RAWSON'S "IDEAL" LAWN GRASS

## For Fall Sowing

For over ten years we have carried on experiments on our extensive trial grounds at Newton, N. H., with every imaginable variety of grass seed, both from Europe and this country, to ascertain and establish a perfect mixture of grasses which would produce an ideal lawn in New England. We have given particular attention to grasses which grow successfully in northern severe climates; at the same time we have aimed to improve the appearance of the lawn. We have now succeeded and are confident in stating that we offer here the most "Ideal" Mixture of Lawn Grass that is offered in New England for New England. It is an established fact that plants which thrive in New England will grow luxuriantly everywhere, and for that reason we claim that

## RAWSON'S "IDEAL" LAWN GRASS

is unrivaled for hardiness, productiveness, purity and luxuriance in growth. The grasses used in this mixture are highly cleaned, free from all chaff and are absolutely fresh, insuring the purchaser quick resalts.

Please note that RAWSON'S "IDEAL" LAWN GRASS weighs 20 pounds per bushel; this in itself is a guarantee of its purity.

THE MAKING OF A LAWN is a pamphlet by our Mr. Rawson, which gives to the minutest detail all possible information on the preparation and formation of a lawn, also on the care of an established one and the renovation of an old one. Every package of Lawn Grass, no matter how small, coutains one of these pamphlets. In order to introduce our Lawn Grass widely, we are willing to deliver free to any post-office or express office in the Lnited States, any quantity up to four quarts, at the price given below.

PRICES: Pt. 15 cts., qt. 25 cts., 2 qts. $45 \mathrm{cts} ., 4 \mathrm{qts} .85 \mathrm{cts} ., \mathrm{pk} . \$ 1.50$, bus. of $20 \mathrm{lbs} . \$ 5$

## QUANTITY REQUIRED FOR A NEW LAWN

One quart is sufficient to sow a plot 300 square feet or $15 \times 20$ feet; one peck 2,000 square feet or $50 \times 40$ feet; five bushels, an acre. For renovating, use half the quantity.

## Rawson's Arlington Lawn Grass

has stood the test of our customers for the past twenty years and must be considered a "quality mixture." When we first introduced this mixture, quality grasses were in imperative need and we selected for this mixture a limited number of the purest and heaviest grasses, which would produce a rich velvety sward in the shortest possible time. It can easily be seen that this mixture is quite different from the preceding one, as it weighs 32 pounds per bushel. We highly recommend this mixture for a quick-producing lawn and one that will retain its beauty for a long time. 1 qt . (will sow 600 sq . ft.) 30 cts .; 2 qts . (will sow $1,300 \mathrm{sq}$. ft .) 55 cts .; 4 qts . (will sow $2,700 \mathrm{sq}$. ft.) $\$ 1 ; 8$ qts. (will sow $5,400 \mathrm{sq}$. ft.) $\$ 2 ; 1$ bus. ( 2 bus. will sow an acre) $\$ 7.5$.

## Rawson's Special Mixtures of Grasses for Special Places

We have in our employ a man who has devoted his lifetime to the planting and perfecting of lawns, terraces, golf links, bowling greens, lawn-temnis grounds, etc., and under whose personal supervision our different mixtures of grasses as offered below are prepared. For this reason we claim our mixtures should give perfect satisfaction.

## Rawson's Special "Shady Location" Lawn Grass

Erery lawn has some shady spots where the regular grasses will not be permanent. Under above beading we offer a mixture which is unsurpassed. Qt. 35 cts., free by mail; 2 qts. 65 cts., free by mail; 4 qts. $\$ 1.25$, free by mail; 8 qts. $\$ 2$, bus. $\$ 7$. This mixture weighs 20 pounds per bushel.

## Rawson’s Special Putting Green Mixture

Suitable both for Putting Greens and Bowling Greens. Pk. \$1.75, bus. \$6. This mixture weighs 25 pound: per bushel.

## Rawson's Special Mixture for Lawn Tennis, Croquet, or Polo Grounds <br> A perfect mixture for such purposes. $\mathrm{Pk} . \$ 2$, bus. $\$ 7$. Weight per bushel 2 ( pounds.

## Rawson's "Terrace Turf" Lawn Grass

This mixture consists of the best close-growing, deep-rooted varieties, which will not be washed away during heavy rains, at the same time produce a rich velvety sward. Qt. 35 cts.. free by mail; 2 qts. 65 cts., free by mail; 4 qts. $\$ 1.25$, free by mail ; 8 qts. $\$ 2$, bus. $\$ 7$. Weight, 20 pounds per bushel.

## NEW SEEDLING CROCUSES

Crocuses are such brilliant and beautiful flowers that one need not occupy space with their praises. Their use in grass is necessary if we are to enjoy our gardens to the full. While the popular varieties, whose names will be found on another page, will retain their place in the garden, they will be largely supplemented by these new seedlings listed below. They are distinct for their colorings, for some of the shades offered here have never been known among Crocuses before. They are all giants in size. One of our customers wrote us last spring: "The new Seedling Crocuses purchased of you last fall are just now in bloom and are admired by everybody. One of our neighbors wanted to know how we came to have such splendid early Tulips, showing the size of bloom, and, furthermore, each bulb produces from four to six flowers."

## LIST OF CROCUSES

## Special offer of twelve bulbs each, of the entire set of rourteen varieties, each dozen named, at $\$ 3$

[^0]:    W. W. Rawson \& Co. give no warranty, either express or implied, as to the growth, kind, description, quality, productiveness or any other matter regarding any seeds they sell; nor will they be in any way responsible for the crop resulting therefrom. If the purchaser does not accept them on these terms, he must return them at once, as they are sold upon these conditions only; where purity or growth are mentioned, they are only for guidance and without guarantee. September, 1907.
